INTERNAL MEMORANDUM

Form HQ-10

SHOW NAME, TITLE AND CORPORATION OF ADDRESSEE AND ADDRESSOR

TO: W. E. Dunnick, Vice President

DATE: December 14, 1971

FROM: Jos. W. Goldenberg, Chief Engineer

SUBJECT: Village of Sauget - Secondary Sewage Treatment

Jerry Jones of Enviro-Chem phoned while both you and Paul were out of the plant. He recommended that no mention of cyanide be made at the hearing in Chicago tomorrow. I concurred in his recommendation. We will have to investigate the discharge from our Tube Mill plating room.

Jones will send a memo recommending that sampling and metering manholes be installed to accurately monitor the discharge from each industry. This will preclude any "haggling" over the capital cost "break out" to each contributor. I received the impression that this would simplify Enviro-Chem's problems with future flow measuring-by the lithium method. Apparently Jerry Jones has discussed this subject with Ben Sparks.
